**The urgency of reducing carbon
emissions can no longer wait on
government, foreign powers or
anyone else to take responsibility.
We must do what we can – NOW.**

According to The Climate Change Authority
“Net zero by 2035 is the only target available
to Australia that provides a strong chance of
contributing to holding global heating below
2 degrees .

**The higher the Government sets our climate
target, the more they will be doing to help
keep Australians safer.”** September 2025
